STD for CoinExchanger Website

Introduction

This document describes the Software Testing Definition - (STD) of CoinExchanger Website which contains the sanity test and the suite's test cases.

Test Document Name	STD for CoinExchanger Website
Test Document Version	1.0
Performed By	Ehab Bolos
Last Update Date	November 02, 2023
Last Update Date	November 03, 2023
Total Testing Days	2

Prerequisites
The CoinExchanger Website is opened on Google Chrome browser
Bug Magnet Extension

Sanity		
Steps	Action	Expected Result
1	Enter the amount "2" in the from textbox	The value "2" appears in the from textbox & the result appears with the value 0.49
Suite 1: Update Page		

Steps	Action	Expected Result
1.1	Func. - Remove a row from the values table	
1.1.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Dollars with the value 0.25 and on the third row we have the type Euros with the value 0.23, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.1.2	Click on the "x" button in the Dollars row	The Dollars row will be removed from the values table
1.2	Func. - Click the "BACK" button	
1.2.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Euros with the value 0.23, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.2.2	Click on the "BACK" button	The update page will close and the home page will open with the header "Exchange" in the first low and below it we have the "From" dropdown and next to it we have the amount textbox, below them we have the "To:" dropdown and below it we have the "Automatic" checkbox and below it we we have the unclickable "start" button, and at the bottom we have the two button, "Update" & "View your exchange list"
1.3	Func. - Add Dollar type	
1.3.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Euros with

		the value 0.23, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.3.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.3.3	Enter the text "Dollar" in the "Type" textbox	The text "Dollar" appears in the "Type" textbox and the amount "0.25" appears in the "New Value" textbox
1.3.4	Click on the "UPDATE" button	The "Dollars" type will be added to the values table with the value "0.25"
1.4	Func. - Add Euro type	
1.4.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Dollars with the value 0.25, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.4.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.4.3	Enter the text "Euro" in the "Type" textbox	The text "Euro" appears in the "Type" textbox and the amount "0.23" appears in the "New Value" textbox
1.4.4	Click on the "UPDATE" button	The "Euros" type will be added to the values table with the value "0.23"
1.5	Func. - Add Pound type	
1.5.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Euros with the value 0.23, next to each type we have "x" button, and below them we have the "Type" and the "New

		Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.5.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.5.3	Enter the text "Pound" in the "Type" textbox	The text "Pound" appears in the "Type" textbox and the amount "0.20" appears in the "New Value" textbox
1.5.4	Click on the "UPDATE" button	The "Pounds" type will be added to the values table with the value "0.20"
1.6	Func. - Add Rupee type	
1.6.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Pounds with the value 0.20, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.6.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.6.3	Enter the text "Rupee" in the "Type" textbox	The text "Rupee" appears in the "Type" textbox and the amount "20.61" appears in the "New Value" textbox
1.6.4	Click on the "UPDATE" button	The "Rupees" type will be added to the values table with the value "20.61"
1.7	Func. - Add Franc type	
1.7.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Rupees with the value 20.61, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"

1.7.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.7.3	Enter the text "Franc" in the "Type" textbox	The text "Franc" appears in the "Type" textbox and the amount "0.22" appears in the "New Value" textbox
1.7.4	Click on the "UPDATE" button	The "Francs" type will be added to the values table with the value "0.22"
1.8	**Func. - Add Ringgit type**	
1.8.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Francs with the value 0.22, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.8.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.8.3	Enter the text "Ringgit" in the "Type" textbox	The text "Ringgit" appears in the "Type" textbox and the amount "1.18" appears in the "New Value" textbox
1.8.4	Click on the "UPDATE" button	The "Ringgits" type will be added to the values table with the value "1.18"
1.9	**Func. - Add Yen type**	
1.9.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Ringgits with the value 1.18, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.9.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table

1.9.3	Enter the text "Yen" in the "Type" textbox	The text "Yen" appears in the "Type" textbox and the amount "37.45" appears in the "New Value" textbox
1.9.4	Click on the "UPDATE" button	The "Yens" type will be added to the values table with the value "37.45"
1.10	Func. - Add Peso type	
1.10.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Yens with the value 37.45, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.10.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.10.3	Enter the text "Peso" in the "Type" textbox	The text "Peso" appears in the "Type" textbox and the amount "14.06" appears in the "New Value" textbox
1.10.4	Click on the "UPDATE" button	The "Pesos" type will be added to the values table with the value "14.06"
1.11	Func. - Add Dinar type	
1.11.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Pesos with the value 14.06, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.11.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.11.3	Enter the text "Dinar" in the "Type" textbox	The text "Dinar" appears in the "Type" textbox and the amount "0.077" appears in the "New Value" textbox

1.11.4	Click on the "UPDATE" button	The "Dinars" type will be added to the values table with the value "0.077"
1.12	**Func. - Add Lev type**	
1.12.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Dinars with the value 0.077, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.12.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.12.3	Enter the text "Lev" in the "Type" textbox	The text "Lev" appears in the "Type" textbox and the amount "0.46" appears in the "New Value" textbox
1.12.4	Click on the "UPDATE" button	The "Levs" type will be added to the values table with the value "0.46"
1.13	**Func. - Add Koruna type**	
1.13.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Levs with the value 0.46, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.13.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.13.3	Enter the text "Koruna" in the "Type" textbox	The text "Koruna" appears in the "Type" textbox and the amount "5.74" appears in the "New Value" textbox
1.13.4	Click on the "UPDATE" button	The "Korunas" type will be added to the values table with the value "5.74"

1.14	Func. - Add Dirham type	
1.14.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Korunas with the value 5.74, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.14.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.14.3	Enter the text "Dirham" in the "Type" textbox	The text "Dirham" appears in the "Type" textbox and the amount "0.91" appears in the "New Value" textbox
1.14.4	Click on the "UPDATE" button	The "Dirhams" type will be added to the values table with the value "0.91"
1.15	Func. - Add Rial type	
1.15.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Dirhams with the value 0.91, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.15.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.15.3	Enter the text "Rial" in the "Type" textbox	The text "Rial" appears in the "Type" textbox and the amount "10459.84" appears in the "New Value" textbox
1.15.4	Click on the "UPDATE" button	The "Rials" type will be added to the values table with the value "10459.84"
1.16	Func. - Add Lira type	

1.16.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Rials with the value 10459.84, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.16.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.16.3	Enter the text "Lira" in the "Type" textbox	The text "Lira" appears in the "Type" textbox and the amount "6.99" appears in the "New Value" textbox
1.16.4	Click on the "UPDATE" button	The "Liras" type will be added to the values table with the value "6.99"
1.17	BV - Add 3 rows to the values table	
1.17.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Liras with the value 6.99, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.17.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
1.17.3	Enter the text "Dollar" in the "Type" textbox	The text "Dollar" appears in the "Type" textbox and the amount "0.25" appears in the "New Value" textbox
1.17.4	Click on the "UPDATE" button	The "Dollars" type will be added to the values table with the value "0.25"
1.17.5	Enter the text "Euro" in the "Type" textbox	The text "Euro" appears in the "Type" textbox and the amount "0.23" appears in the "New Value" textbox
1.17.6	Click on the "UPDATE" button	The "Euros" type will be added to the values table with

		the value "0.23"
1.17.7	Enter the text "Pound" in the "Type" textbox	The text "Pound" appears in the "Type" textbox and the amount "0.20" appears in the "New Value" textbox
1.17.8	Click on the "UPDATE" button	The "Pounds" type will be added to the values table with the value "0.20"
1.18	EH - Add the type " "	
1.18.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Dollars with the value 0.25 and on the third row we have the type Euros with the value 0.23, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.18.2	Click on the "x" button in the Dollars row	The Dollars row will be removed from the values table
1.18.3	Click on the "x" button in the Euros row	The Euros row will be removed from the values table
1.18.4	Click on the "x" button in the Pounds row	The Pounds row will be removed from the values table
1.18.5	Enter the char " " in the "Type" textbox	The char " " appears in the "Type" textbox and the "New Value" textbox does not changes
1.18.6	Click on the "UPDATE" button	An error alert with the text "This field can't be empty" pops up below the "New Value" textbox
1.19	EH - Add the type "@"	
1.19.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, next to that type we have "x" button, and below the row we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.19.2	Enter the char "@" in the "Type" textbox	The char "@" appears in the "Type" textbox and the

		"New Value" textbox does not changes
1.19.3	Click on the "UPDATE" button	An error alert with the text "This field can't be empty" pops up below the "New Value" textbox
1.20	EH - Add the type "a"	
1.20.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, next to that type we have "x" button, and below the row we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.20.2	Enter the char "a" in the "Type" textbox	The char "a" appears in the "Type" textbox and the "New Value" textbox does not changes
1.20.3	Click on the "UPDATE" button	An error alert with the text "This field can't be empty" pops up below the "New Value" textbox
1.21	EH - Add the type "1"	
1.21.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, next to that type we have "x" button, and below the row we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.21.2	Enter the char "1" in the "Type" textbox	The char "1" appears in the "Type" textbox and the "New Value" textbox does not changes
1.21.3	Click on the "UPDATE" button	An error alert with the text "This field can't be empty" pops up below the "New Value" textbox
1.22	EH - Add 4 rows to the values table	
1.22.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, next to that type we have "x" button, and below

		the row we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
1.22.2	Enter the char "1" in the "Type" textbox	The char "1" appears in the "Type" textbox and the "New Value" textbox does not changes
1.22.3	Click on the "UPDATE" button	An error alert with the text "This field can't be empty" pops up below the "New Value" textbox
1.22.4	Enter the text "Dollar" in the "Type" textbox	The text "Dollar" appears in the "Type" textbox and the amount "0.25" appears in the "New Value" textbox
1.22.5	Click on the "UPDATE" button	The "Dollars" type will be added to the values table with the value "0.25"
1.22.6	Enter the text "Euro" in the "Type" textbox	The text "Euro" appears in the "Type" textbox and the amount "0.23" appears in the "New Value" textbox
1.22.7	Click on the "UPDATE" button	The "Euros" type will be added to the values table with the value "0.23"
1.22.8	Enter the text "Pound" in the "Type" textbox	The text "Pound" appears in the "Type" textbox and the amount "0.20" appears in the "New Value" textbox
1.22.9	Click on the "UPDATE" button	The "Pounds" type will be added to the values table with the value "0.20"
1.22.10	Enter the text "Yen" in the "Type" textbox	The text "Yen" appears in the "Type" textbox and the amount "37.51" appears in the "New Value" textbox
1.22.11	Click on the "UPDATE" button	An error alert with the text "The table is full, the new type can't be added." pops up below the "New Value" textbox
Suite 2: Home Page		
Steps	Action	Expected Result
2.1	Func. - Exchange from Shekels to Dollars manually	

2.1.1	Enter the amount "2" in the from textbox	The value "2" appears in the from textbox
2.1.2	Click on the "Automatically" checkbox	The "Automatically" checkbox is unselected and the "Start" button is clickable
2.1.3	Click on the "Start" button	The result appears with the value 0.49
2.2	Func. - Exchange from Shekels to Shekels	
2.2.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Dollars with the value 0.25 and on the third row we have the type Euros with the value 0.23, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
2.2.2	Click on the "x" button in the Dollars row	The Dollars row will be removed from the values table
2.2.3	Click on the "x" button in the Euros row	The Euros row will be removed from the values table
2.2.4	Click on the "x" button in the Pounds row	The Pounds row will be removed from the values table
2.2.5	Click on the "x" button in the Dollars row	The Dollars row will be removed from the values table
2.2.6	Click on the "BACK" button	The update page will close and the home page will open with the header "Exchange" in the first low and below it we have the "From" dropdown and next to it we have the amount textbox, below them we have the "To:" dropdown and below it we have the "Automatic" checkbox and below it we we have the unclickable "start" button, and at the bottom we have the two button, "Update" & "View your exchange list"
2.2.7	Click on the "Automatically" checkbox	The "Automatically" checkbox is selected and the "Start" button is unclickable
2.2.8	Select the type "Shekels" in the "To:" dropdown	The "To:" dropdown changes to "Shekels"

2.2.9	Enter the amount "2" in the from textbox	The value "2" appears in the from textbox & the result appears with the value 2
2.3	**Func. - Exchange from Dollars to Shekels**	
2.3.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, next to that type we have "x" button, and below the row we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
2.3.2	Enter the text "Dollar" in the "Type" textbox	The text "Dollar" appears in the "Type" textbox and the amount "0.25" appears in the "New Value" textbox
2.3.3	Click on the "UPDATE" button	The "Dollars" type will be added to the values table with the value "0.25"
2.3.4	Click on the "BACK" button	The update page will close and the home page will open with the header "Exchange" in the first low and below it we have the "From" dropdown and next to it we have the amount textbox, below them we have the "To:" dropdown and below it we have the "Automatic" checkbox and below it we we have the unclickable "start" button, and at the bottom we have the two button, "Update" & "View your exchange list"
2.3.5	Select the type "Dollar" in the "From:" dropdown	The type "Dollar" is selected in the "From:" dropdown
2.3.6	Select the type "Shekels" in the "To:" dropdown	The type "Shekels" is selected in the "To:" dropdown
2.3.7	Enter the amount "2" in the from textbox	The value "2" appears in the from textbox & the result appears with the value 8.09
2.4	**Func. - Exchange from Shekels to Euros**	
2.4.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the

		value 1, in the second row we have the type Dollars with the value 0.25, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
2.4.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
2.4.3	Enter the text "Euro" in the "Type" textbox	The text "Euro" appears in the "Type" textbox and the amount "0.23" appears in the "New Value" textbox
2.4.4	Click on the "UPDATE" button	The "Euros" type will be added to the values table with the value "0.23"
2.4.5	Click on the "BACK" button	The update page will close and the home page will open with the header "Exchange" in the first low and below it we have the "From" dropdown and next to it we have the amount textbox, below them we have the "To:" dropdown and below it we have the "Automatic" checkbox and below it we we have the unclickable "start" button, and at the bottom we have the two button, "Update" & "View your exchange list"
2.4.6	Select the type "Shekels" in the "From:" dropdown	The type "Shekels" is selected in the "From:" dropdown
2.4.7	Select the type "Euros" in the "To:" dropdown	The type "Euros" is selected in the "To:" dropdown
2.4.8	Enter the amount "2" in the from textbox	The value "2" appears in the from textbox & the result appears with the value 0.47
2.5	Func. - Exchange from Euros to Euros	
2.5.1	Select the type "Euros" in the "From:" dropdown	The type "Euros" is selected in the "From:" dropdown
2.5.2	Enter the amount "2" in the from textbox	The value "2" appears in the from textbox & the result appears with the value 2

2.6	Func. - Exchange from Euros to Shekels	
2.6.1	Select the type "Shekels" in the "To:" dropdown	The type "Shekels" is selected in the "To:" dropdown
2.6.2	Enter the amount "2" in the from textbox	The value "2" appears in the from textbox & the result appears with the value 8.56
2.7	Func. - Exchange from Shekels to Pound	
2.7.1	Click on the "Update" button	The update page opens with a table that contains 3 row, in the first row we have the type Shekels and the value 1, in the second row we have the type Euros with the value 0.23, next to each type we have "x" button, and below them we have the "Type" and the "New Value" textboxes and at the bottom we have 2 buttons, "BACK" & "UPDATE"
2.7.2	Click on the "x" button in the row that's under the Shekels row	The row that's under the Shekels row will be removed from the values table
